wherein the water-miscible organic solvent and the limited water-miscible organic solvent are selected from the group consisting of: alcohols, glycols, esters, glycol ethers, terpenes and mixtures thereof; and

wherein the weight ratio of the water-miscible organic solvent to the limited water-miscible organic solvent is from about 4:1 to about 1:20; and

b) optionally, a surfactant.

52. The composition according to Claim 51 wherein the composition has a liquid surface tension of less than about 24.5 MN/m.

53. The composition according to Claim 51 wherein the composition has a pH as measured in a 10% solution of distilled water of at least 10.5.

54. The composition according to Claim 51 wherein the composition has a reserve alkalinity of less than about 5.

55. The composition according to Claim 51 wherein the surfactant is present in the composition at a level of from about 0.05% to about 10% by weight of the composition.

56. The composition according to Claim 51 wherein the surfactant is selected from the group consisting of: anionic, amphoteric, zwitterionic, nonionic and semi-polar surfactants and mixtures thereof.

57. The composition according to Claim 56 wherein the surfactant comprises an amine oxide.

58. The composition according to Claim 51 wherein the organoamine solvent is selected from the group consisting of alkanolamines, alkylamines, alkyleneamines and mixtures thereof.

59. The composition according to Claim 58 wherein the organoamine solvent comprises an alkanolamine.

60. The composition according to Claim 51 wherein the water-miscible organic solvent is selected from the group consisting of: alcohols, glycols, glycol ethers and mixtures thereof.

61. The composition according to Claim 60 wherein the water-miscible organic solvent comprises a glycol ether.

62. The composition according to Claim 61 wherein the water-miscible organic solvent comprises diethylene glycol monobutyl ether.
63. The composition according to Claim 51 wherein the limited water-miscible organic solvent is selected from the group consisting of: alcohols, glycols, glycol ethers, esters, terpenes and mixtures thereof.
64. The composition according to Claim 63 wherein the limited water-miscible organic solvent comprises a glycol ether.
65. The composition according to Claim 64 wherein the limited water-miscible organic solvent comprises propylene glycol butyl ether.
66. The composition according to Claim 51 wherein the composition is capable of displaying an advancing contact angle on a soiled glass substrate at 25°C of less than about 20°.
67. The composition according to Claim 51 wherein the composition exhibits a soil swelling index of at least about 100%.
68. The composition according to Claim 67 wherein the composition has a liquid surface tension of less than about 30mN/m.
69. The composition according to Claim 51 wherein the solvent system is present in the composition at a level of from about 10% to about 40% by weight of the composition.
70. The composition according to Claim 69 wherein the solvent system comprises from about 1% to about 15% by weight of the composition of the organoamine solvent.
71. The composition according to Claim 69 wherein the solvent system comprises from about 7% to about 30% by weight of the composition of a mixture of the water-miscible and limited water-miscible organic solvents.
72. The composition according to Claim 71 wherein the solvent system comprises at least about 3.5% by weight of the composition of the water-miscible organic solvent.

73. The composition according to Claim 71 wherein the solvent system comprises at least about 3.5% by weight of the composition of the limited water-miscible organic solvent.

74. The composition according to Claim 51 wherein the weight ratio of water-miscible organic solvent to limited water-miscible organic solvent is from about 2:1 to about 1:6.

75. The composition according to Claim 51 wherein the surfactant has a liquid surface tension of less than about 30mN/m.

76. The composition according to Claim 51 wherein the surfactant lowers the liquid surface tension of the solvent system to at least 1mN/m less than the liquid surface tension of the surfactant.

77. The composition according to Claim 51 wherein the composition has a soil removal index of at least 25%.

A1  
cont

78. The composition according to Claim 51 wherein the composition is in the form of a shear thinning fluid having a shear index (n) of from about 0.3 to about 0.7 and a consistency index of from about 0.20 to about 0.15 Pa.s<sup>n</sup>.

79. The composition according to Claim 78 wherein the composition has a flow velocity of less than about 1cm/s when sprayed on a vertical stainless steel surface.

80. The composition according to Claim 51 wherein the composition further comprises a thickening agent selected from the group consisting of synthetic smectite clays, natural gums and mixtures thereof.

81. The composition according to Claim 51 wherein the organoamine and the mixture of the water-miscible and limited water-miscible organic solvents are present in the solvent system at a weight ratio of from about 3:1 to about 1:3.

82. The composition according to Claim 51 wherein the solvent system has a volatile organic solvent content above 1 mm Hg of less than about 50%.

83. The composition according to Claim 51 wherein the solvent system is essentially free of solvent components that have a boiling point below about 150°C and/or a flash point below about 50°C and/or a vapor pressure of above about 1 mm Hg.
84. The composition according to Claim 51 wherein the composition is in the form of a dishwashing pretreatment composition.
85. The composition according to Claim 51 wherein the composition is in the form of an automatic dishwashing detergent composition.
86. The composition according to Claim 51 wherein the composition further comprises a salt having a divalent cation.
87. The composition according to Claim 51 wherein the composition further comprises a perfume component.
88. The composition according to Claim 87 wherein the perfume component comprises an ionone.
89. The composition according to Claim 88 wherein the ionone is derived from a natural containing ionone material selected from the group consisting of: mimosa, violet, iris, orris and mixtures thereof.
90. The composition according to Claim 87 wherein the perfume component comprises a musk having a boiling point of greater than about 250°C.
91. The composition according to Claim 51 wherein the composition further comprises a cyclodextrin.

---

REMARKS

Applicants hereby affirm the election of Group I, the subject matter claimed in Claims 1-44.

Applicants have cancelled Claims 1-50 without prejudice. The elected subject matter of Claims 1-44 is now present in new Claims 51-91. Support for new Claims 51-91 is found in the Specification, especially the originally filed claims.
